## **COURSE DESCRIPTIONS**

### **Certified Nursing Assistant**

This program is comprised of theory, lab and clinical instructions. It will focus on the why and how behind each skill, the relationship between body systems, disease illness and patient treatment plans, medical and nursing terminology, key observations during patient care, treatment and procedures, and much more.

### **Phlebotomy Technician**

This course is comprised of lecture, lab and clinical. The student will learn the safety precautions as well as the various types of veni-puncture. He/she will receive training with various types of equipment, will be taught proper handling procedures, along with special training for handling special situations dealing with diverse patients. Upon completion of training student will receive a diploma.

### **EKG**

This course will teach students how to use an electro-cardiogram machine for the purpose of studying heart rates and activity, diagnose heart disease and analyze changes to patients hearts over time.

### **Patient Care Technician**

This course is a combination of our advanced CNA, EKG, & Phlebotomy programs. Upon completion the graduate will be a much needed asset to any health care facility as a multi-skilled partner in the medical field, who are certified as a CNA, yet has the knowledge & training to perform many skills & tasks such as EKG & Phlebotomy.

## **Payment Options**
